

Ram Krishna Paudel

Software Developer

Lalitpur-11 Sankhamul , Nepal • +977-9847357835 • ramkrishnaimmortal@gmail.com

in @ <https://www.linkedin.com/in/ram-krishna-paudel-073a672a3/> **@** <https://github.com/ramkrishnapaudel55>

Backend-focused software developer with strong expertise in Python, Django, and Django REST Framework, specializing in building scalable APIs and efficient backend systems. Experienced in database design and optimization with PostgreSQL, caching and performance optimization using Redis, and asynchronous task processing with Celery and RabbitMQ. Skilled in Docker-based deployments, application hosting with Coolify, and modern DevOps workflows. Proficient in Git, with additional experience in React.js, Next.js, and TypeScript for full-stack development.

EXPERIENCE

Jr Python Developer.

Kathmandu

Guru Infosys Pvt. Ltd.

Mar, 2025 - Feb, 2026

- Developed backend systems using Django and Django REST Framework (DRF).
- Designed and implemented RESTful APIs for various application modules.
- Worked with PostgreSQL for database design, queries, and data management.
- Built frontend components using HTML, CSS, JavaScript, Bootstrap and basic jQuery.
- Developed frontend systems using React Js, Next Js and Tailwind css.
- Processed and analyzed data using Pandas, including data extraction from Excel files.
- Implemented import/export functionalities for Excel and other file formats.
- Developed features for document upload, storage, and management.
- Built a dynamic document generation system
- Worked on a Loan Management System (LMS) with multiple modules and workflows.

Backend Developer

Kathmandu

English Hub

Feb, 2022 - Oct, 2022

- Developed and maintained backend systems using Django and Django REST Framework (DRF).
- Built and managed RESTful APIs to support web and application features.
- Contributed to the development of Admin Panel and User Panel, ensuring smooth functionality and usability.
- Worked on frontend integration using HTML, CSS, JavaScript, and Bootstrap.
- Worked with Docker, Redis, Celery and RabbitMQ
- Developed and maintained frontend systems using React Js and Tailwind css.
- Assisted in building UI components and improving user experience.
- Gained basic experience with React for frontend development and component structuring.
- Handled database operations, data validation, and API testing.
- Fixed bugs, improved performance, and ensured application stability.

Internship

Kathmandu

English Hub

Dec, 2021 - Feb, 2022

- Developed and maintained web applications using Django and Django REST Framework (DRF).
- Designed and implemented RESTful APIs for frontend and third-party integrations.
- Worked with relational databases (PostgreSQL/SQLite) for data modeling and management.
- Built responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Collaborated with frontend developers to integrate APIs with UI components.
- Implemented authentication, authorization, and role-based access control.
- Participated in deployment and basic server management tasks.

EDUCATION

SEE

Arghakhanchi

Himalayan English Boarding Schooh

Jan, 2017 - Mar, 2018

Intermediate(+2)

Butwal

Bachelor

Lalitpur

Nepal College of Information Technology

Jan, 2022 - Present

PROJECTS

CV Builder

Built a dynamic CV Builder web application that allows users to input personal and professional details, select from pre-designed templates, and download the final CV as a PDF.

- Frontend: ReactJS, TailwindCSS, Material UI for responsive and modern UI design.
- Backend: Django Rest Framework (DRF) for handling user data and PDF generation.
- Features: User authentication, real-time preview, multiple CV templates, PDF export.

<https://github.com/CV-Builder-ResumeForge>

E-commerce Website

- Developed scalable backend services using Django and Django REST Framework (DRF).
- Designed and implemented RESTful APIs for product management, user authentication, and order processing.
- Managed database operations using PostgreSQL, including schema design and query optimization.
- Implemented core backend features like cart management, order handling, and user workflows.
- Implement Redis for caching, celery for background task and RabbitMQ for task queue (Message broker).
- Ensured data validation, API security, and efficient error handling.
- Used Docker and Coolify for deployment

<https://leukaa.com>, <https://github.com/e-com-project-32>

Smart Vyapar Mobile Application

- Developed a complete mobile application independently using Flutter, handling both frontend and backend logic.
-

Designed and implemented backend services including data models, business logic, and application workflows.

- Managed local database and data persistence for online functionality.
- Implement Redis for caching, celery for background task and RabbitMQ for task queue (Message broker).
- Integrated and handled API communication for data synchronization and processing.
- Implemented features for business operations, ensuring proper data validation and secure handling.
- Docker and Coolify for deployment.

<https://github.com/AI-Based-Business-Analytics>

Medical AI Assistant

Developed backend APIs for an AI-powered medical assessment platform using Django REST Framework and PostgreSQL.

- Built dynamic health assessment modules (e.g., general, cardiovascular) with structured questionnaires.
- Integrated NVIDIA AI model APIs to analyze user responses and generate health insights.
- Implemented risk classification (Low, Medium, High) with causes, consequences, and recommendations.
- Designed scalable database models for assessments, questions, responses, and reports.
- Docker and Coolify for deployment.

ACHIEVEMENTS

Professional Achievements

Developed and launched key web applications using React.js for front-end and Django REST Framework for back-end, significantly improving user experience and functionality.

TRAINING/CERTIFICATIONS

Data Science

2023

EC Council

Kathmandu Metropolitan City, in collaboration with EC-Council India, organized a specialized training program for IT students. As part of this initiative, successfully completed a comprehensive Data Science training program, gaining hands-on experience in data analysis, data preprocessing, statistical techniques, data visualization, and working with Python-based data science tools and libraries.

SKILLS

Experience with python libraries and frameworks (e.g., Django, Django REST Framework), Experience of Docker, Redis and message broker like RabbitMQ, Proficient of version control systems, such as Git., API Testing: Hands-on experience with Postman to test RESTful APIs and validate the responses, Experience with Database like PostgreSQL, Clear and effective communication with cross-functional teams., Proficient in writing clean HTML, CSS and Javascript code., Ability to translate technical jargon into layman's terms.

LANGUAGE

Nepali, English
